# ABOUT VANGÅRD

Vangard is a family owned textile company founded in 1948 in Denmark, Bo Vang who is the third generation is now owner of the company.

We have 70 years of experience with production and development of technical and certified garments within teamwear, corporate ID and underwear.

Together with our knowledge of textile we are also one of the European frontrunners into sublimation print on textile.

## Works as follows:

1. The finished design is printed on rolls with sublimation paper
2. The pattern parts are cut out
3. The colour molecules are heated directly into the fibers on the pattern parts
4. The pattern parts are sewn together and the product is ready
5. Before it is sent out we make a final quality control

## Advantages of sublimation print:

1. The colours will remain bright, because they are heated directly in the fibers and not on the surface
2. The print will never crack as transfer print eventually will, because it is inside the fibers
3. The product is breathable, because the print is not on the surface

Our philosophy has always been to be proactive in optimizing quality, fit and design, that's why we currently develop our products in cooperation with professional athletes and other endusers, in this way we can get detailed feedback first hand.

We are working with the biggest operators on the European Market. The companies we are working with are more than just customers to us – they are business partners and we make the best results in close co-operation and with an open dialogue.

You specify your needs and we will go the extra mile to fulfill them.

Customer satisfaction is our declared aim. That's why we never compromise in matters of quality and fitting comfort. We make use of all the expertise we have to our disposal to produce professional and functional clothing in accordance with state-of-the-art fabric technologies and ergonomics.

Vangard has more than 100 employees in Denmark and on our Joint-Venture factories in Poland and Ukraine.

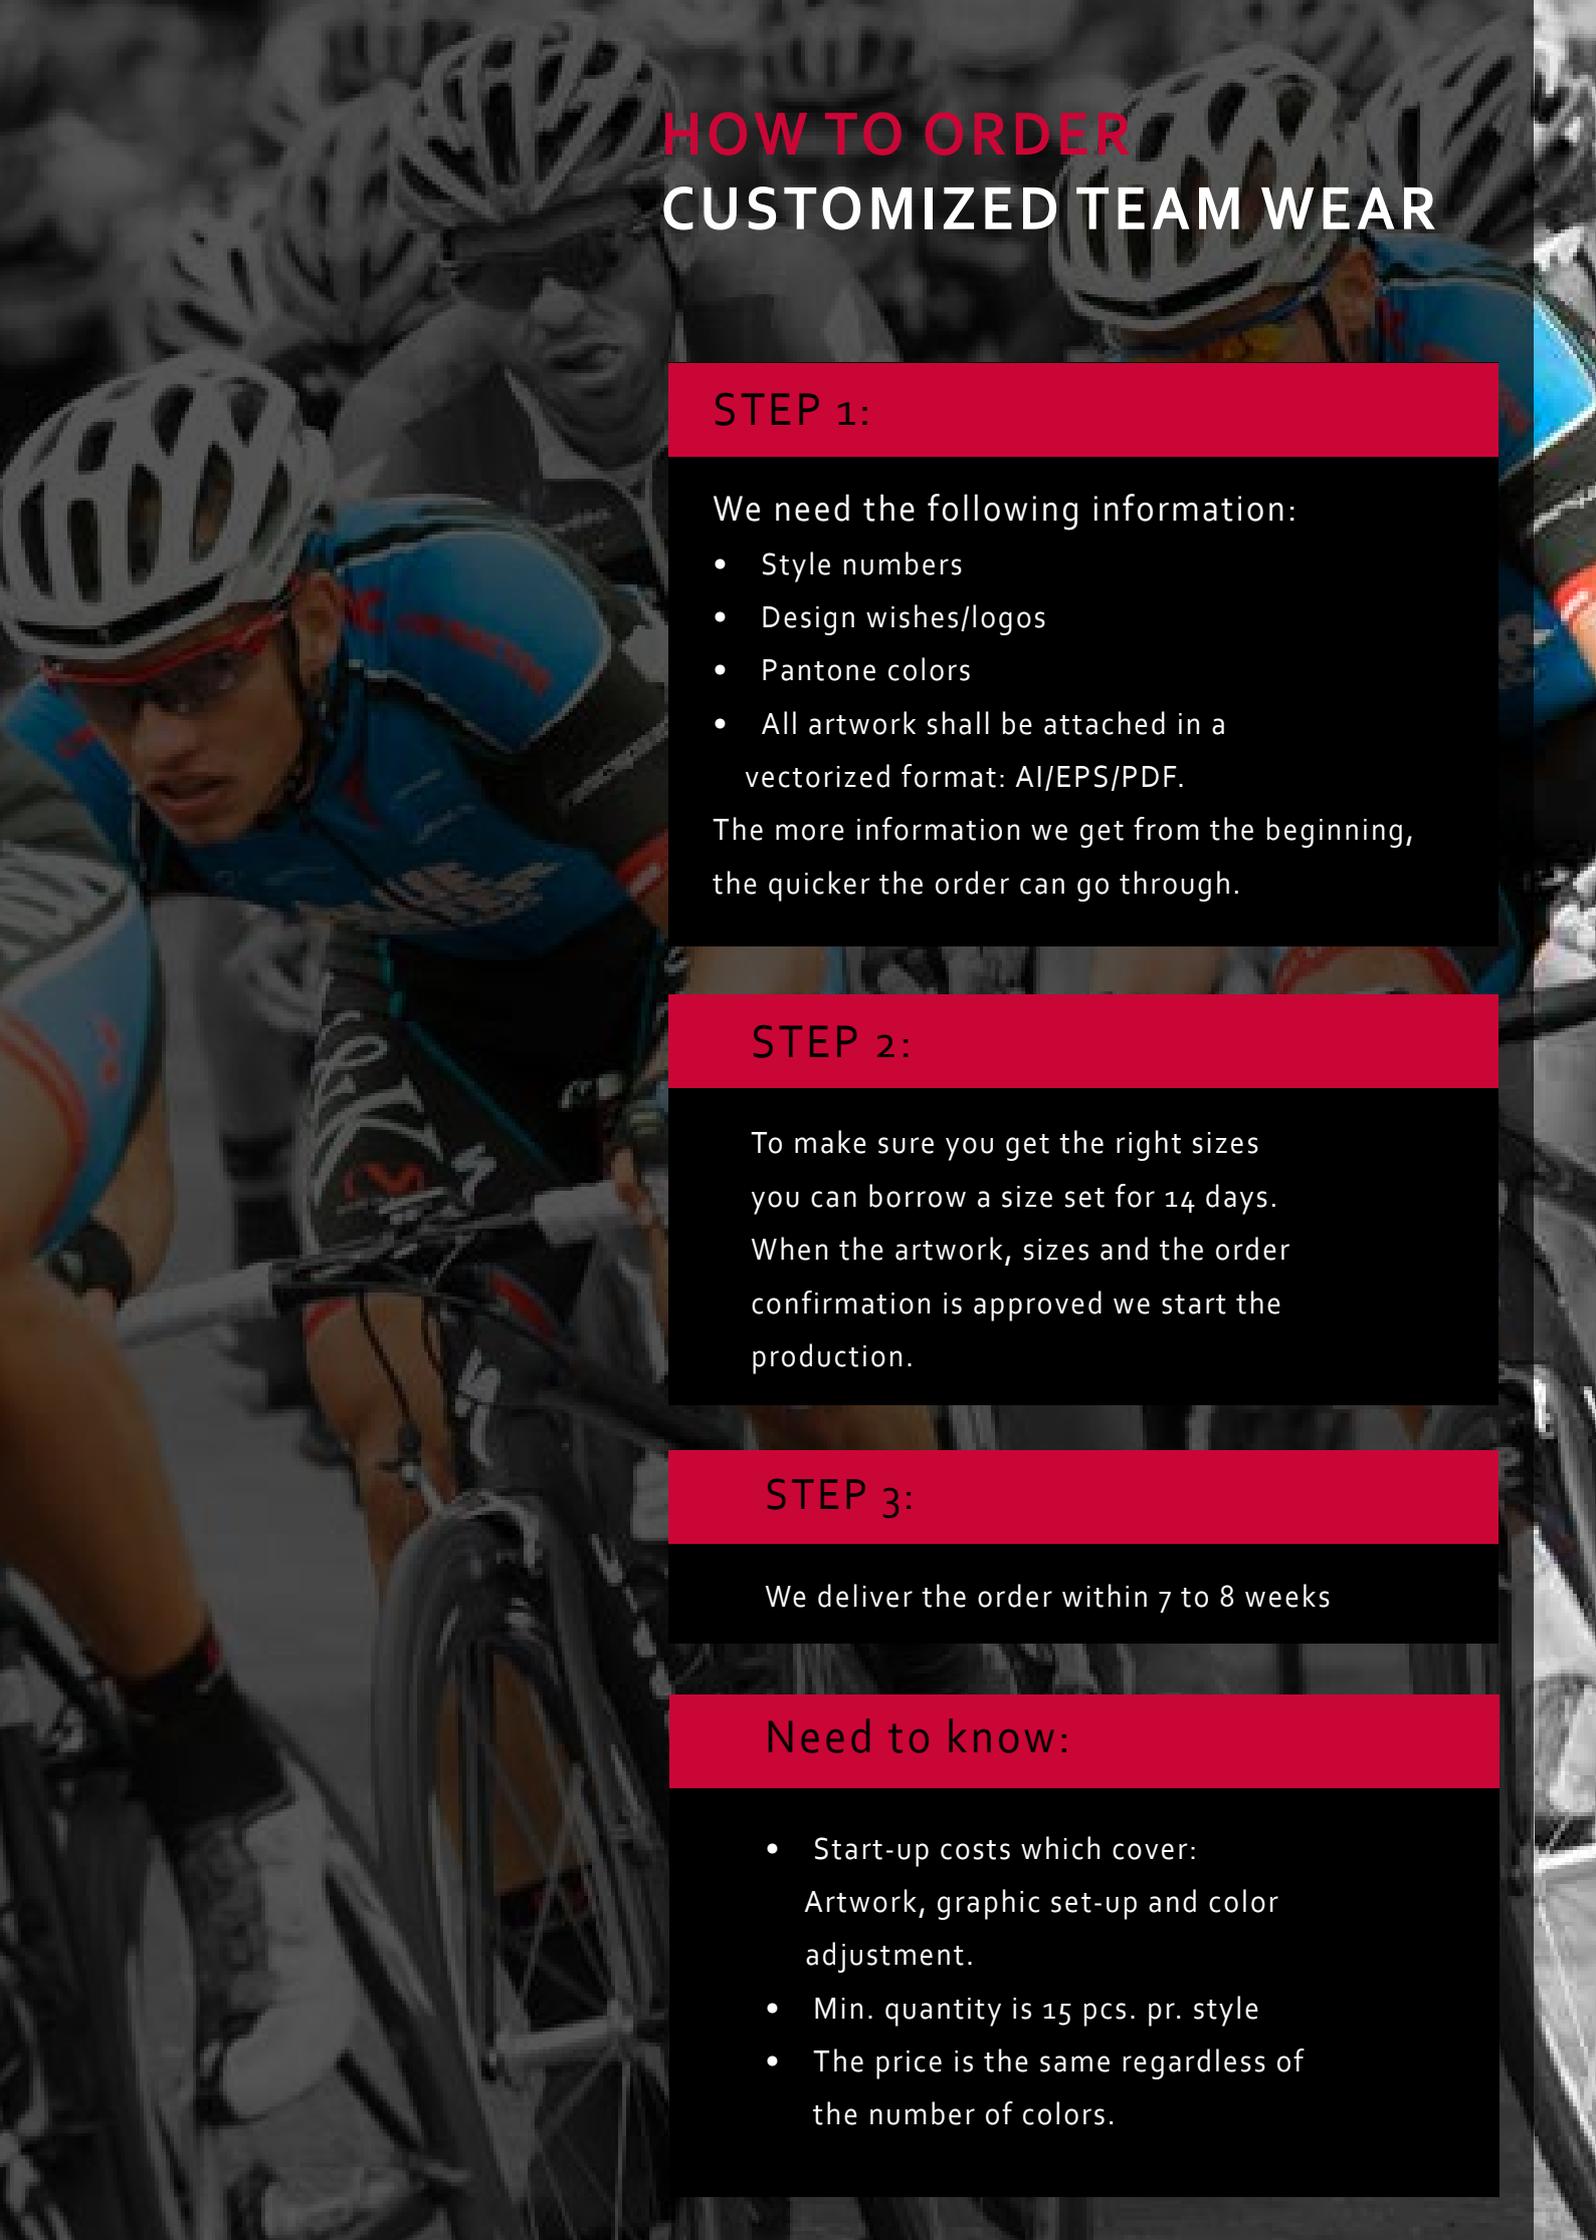

We look forward to serve you.

## **OEKO-TEX®**

Vangård Retail A/S is very focused on the environment and sustainability and we make high demands on our production and our suppliers.

To make sure that our products are allergy- and environmentally friendly, we have been OEKO-TEX® (ECO-TEX®) STANDARD 100 certified. This means that our products are certified to be below the EU limits on all relevant chemicals in the colouring and bleaching process.

# HOW TO ORDER CUSTOMIZED TEAM WEAR

## STEP 1:

We need the following information:

- Style numbers
- Design wishes/logos
- Pantone colors
- All artwork shall be attached in a vectorized format: AI/EPS/PDF.

The more information we get from the beginning, the quicker the order can go through.

## STEP 2:

To make sure you get the right sizes you can borrow a size set for 14 days. When the artwork, sizes and the order confirmation is approved we start the production.

## STEP 3:

We deliver the order within 7 to 8 weeks

## Need to know:

- Start-up costs which cover: Artwork, graphic set-up and color adjustment.
- Min. quantity is 15 pcs. pr. style
- The price is the same regardless of the number of colors.

# INSPIRATION

We have gathered some designs from some of our customers, so you can see who we work with and maybe be inspired from the designs. Some customers have their own design, some use our design suggestions and some have colour wishes, but want our designer to come up with some good ideas.

You can make a sharp classical look or you can make an all over print with the logo or a campaign.

There are no limits on colours or logos, since it is sublimation print.

Advantages: Since the colours are printed directly into the fibers the colours will stay – the print will never crack like on transfer print and it is breathable.

TEAM WEAR COLLECTION

- CYCLING

# WE OFFER 3 LINES OF CUSTOMIZED BIKE WEAR

## ENTRY

Our basic bike set, which is suitable for newcomers.

Despite the fact that it is a basic set, the quality of the product is still high.

These products are durable and will meet the expectations of the price-conscious consumers.

## TECH

The tech set is a superstructure of the entry products with more functional details.

Tech is suitable for those who want a high level performance set.

This is developed in cooperation with professional athletes.

## PRO

The pro set has all the professional details for a perfect aerodynamic fit.

It will give you the optimal conditions for your performances.

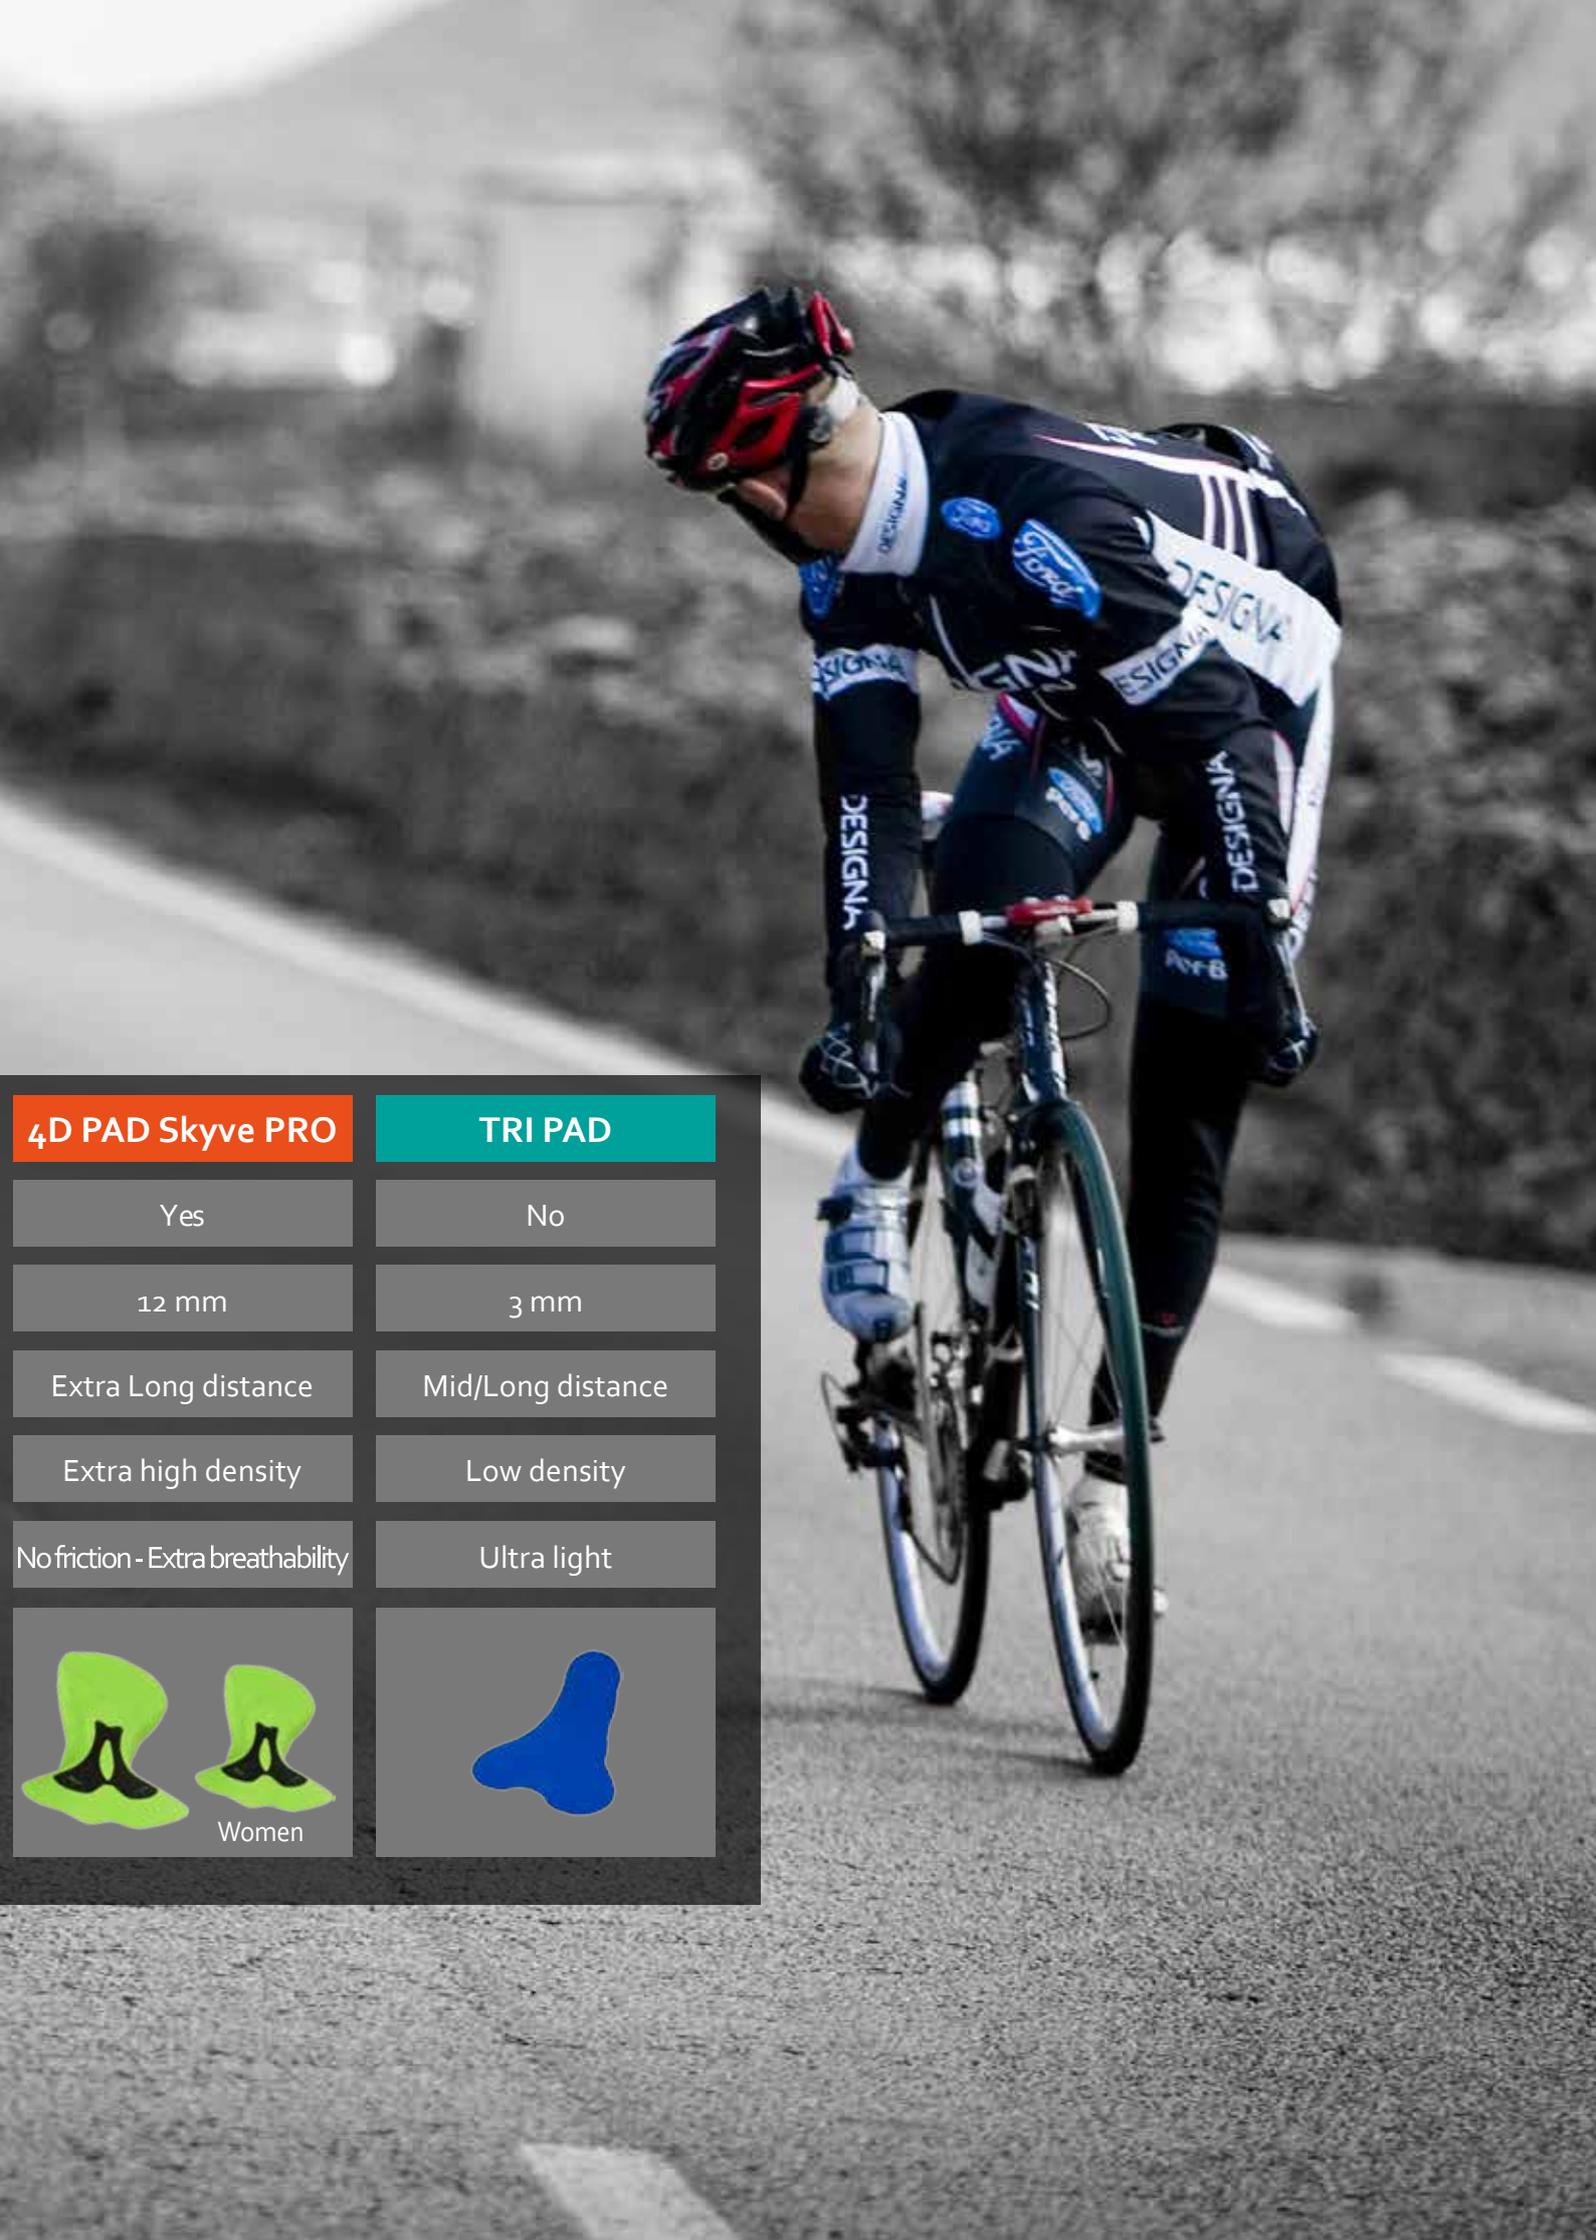

It will keep you dry, it is breathable and the 4D pad will keep you comfortable for the long distances.

# PADS OVERVIEW

Our pads are made by top suppliers in Italy for the best ergonomics, comfort and performance. The high impact foam creates the perfect density, but still it is moisture transporting to prevent friction and pain even on a long distance ride.

It is crucial for a long ride, that the shape, density and dryness is perfect and we have designed our pants and pads by testing and adjusting them on professional athletes.

	2D PAD	3D PAD	4D PAD
PRE-SHAPED	Yes	Yes	Yes
THICKNESS	8 mm	10 mm	12 mm
CATEGORY	Mid/Long distance	Long distance	Long distance
DENSITY	Medium density	High density	Extra high density
KILLER FEATURE	Value for money	High-impact foam	High vapor effect
	 Women	 Women	 Women

4D PAD Skyve PRO	TRI PAD
Yes	No
12 mm	3 mm
Extra Long distance	Mid/Long distance
Extra high density	Low density
No friction - Extra breathability	Ultra light

**TEAM WEAR EXPRESS PRINT**

## About express print

- Delivery within 14 days
- The design and layout have been made
- The articles are in stock
- Logos can be placed on the white areas
- The price per logo is the same regardless of size and number of colors
- Low start-up costs
- Minimum quantity is only 5 pcs

## How to order express print

- You send the logos and the placement
- You send the size chart
- We will make the layout and send it to you for approval

The production will start when the above is approved.

# QUALITY DESCRIPTION

## Elite MTS

Elite Moisture Transport System was created by Vangård on the basis of 25 years of experience in the production of high-yielding technical underwear.

The unique feature is not only the fabric's exceptional elasticity of 300 %, but also the very special way it is knitted. The Dacron® polyester microfibre from ADVASA is spun so that it gets small fuzzy fibres which guide the perspiration towards the core of the thread and away from the body.

MTS is tight-fitted and has freedom of movement. Of course sewn with flatlock without bothering seams, and labels are sewn on to the outside of the underwear. Professional athletes participate in securing the ongoing product development.

## Elite MTS-Windflex

Its unique features include the fabric's exceptional elasticity, high moisture transport, and the very special way it is knitted. Windflex is 100% windproof and at the same time breathable and with its 4 ways stretch you get an innovative fabric with great performance. The material dries faster than traditional materials and keeps you comfortable at all times. Elite MTS is tight-fitted and designed to the contours of your body for optimal freedom of movement. Elite MTS is for those who expect the best during extreme sports performances. Professional athletes from running to biking to skiing have participated in an ongoing product development.

## YKK Zippers

The products are made of the best materials that are produced with the most modern technology in the world. YKK has an extremely restrictive quality control which makes sure, that the standard and the durability is very high.

## WINDTECH®

Windtech increases your power output. By protecting you from wind chill it allows you to devote more energy to your activity instead of keeping your body warm.

### Revolutional®Energy

Revolutional Energy are dedicated to real and very demanding sports people who look for both performance and comfort. Featuring extra stretch and excellent shape recovery power, this fabrics by Carvico guarantee a high muscular support, enhancing the performance of athletes. Exceptionally chlorine resistant, Revolutional®Energy are also perfect for activewear and competition swimwear, and are reliable even after many hours spent into pool water. Full screen from UV rays (UPF 50+), fast drying, pilling and abrasion resistance, exceptional breathability, sand resistance, perfect fit and amazing muscular compression.

### TEK Series

Tek Series is a particular membrane characterized by a notable resistance of cold, wind, water and high perspiration. Tek Series Membrane has the water column > 10.000 mm and it is completely windproof and has a breathability > 11.000 gr/mq/24h. Tek Series is today used for jackets in our outdoor and bike collections where protection against weather and wind is of great importance.

### COOL MESH

Net structure for extra high breathability suitable for high temperatures. Tight fitted and freedom of movement for a strong performance. Made with flatlock seams to prevent irritated skin. Wash by 60 degrees. Oekotex Standard 100 certified (Tested for harmful substances). Made in Europe. Tested and developed by professional athletes.

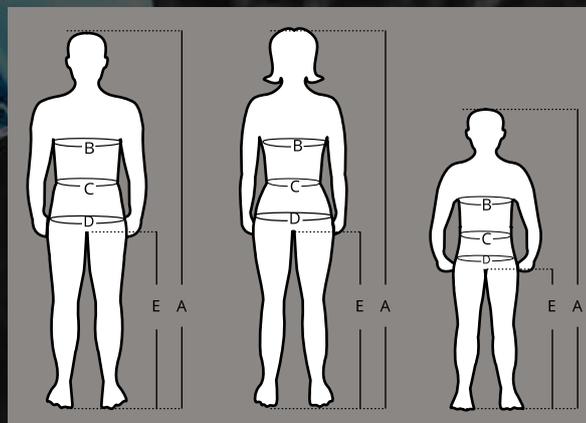

### Stay Dry

Stay dry is developed for bike shirts, functional T-shirts and secondlayer products. The mixture of polyester microfibre and spun polyester gives an exquisite and soft handle. The sporty knitting structure provides high elasticity, perspiration transport and freedom of movement.

# SIZE CHART

Bike Wear is made of elastic and flexible material and cut to fit a slim and athletic body. Please note, all measurements are body measurements.

# TERMS OF BUSINESS

## 1. The receipt of orders.

- a. All orders are received subject to reservations for strikes, lockout, accidents or other cases of force majeure, including the failure of deliveries from suppliers of raw material or from sub-suppliers.
- b. The seller is entitled to postpone the delivery period stated on the front page by up to a maximum of 30 days after the date of delivery.
- c. Should the company feel that it is necessary to gather further information concerning the proper completion of the order, or feel that certain points need to be clarified, then the company's date of delivery is to be postponed accordingly.
- d. The customer is not entitled to alter or cancel any order later than 6 weeks prior to the date of delivery that has been stated.
- e. The company reserves the right to deliver any order with a quantity margin of +/- 10%.

## 2. Complaints

- a. Should the customer find that a delivery is defective, then any complaint must be made immediately after the earliest time which defects might have been discovered and at the latest 30 days after the receipt of goods.
- b. Complaints are to be made in writing, and are to contain a precise specification of the nature of faults or defects. Samples or other material, which will enable the company to access the nature of the complaint, may even accompany complaints. Unless anything else has been agreed, a complaint is not regarded as presented completely until the company is in possession of all necessary information.
- c. If certain circumstances in connection with previous deliveries to a customer have not been presented as defects or deficiencies, then these circumstances may not be presented as defects or deficiencies by the same customer in connection with subsequent deliveries, unless it can be shown that these circumstances have caused defects or deficiencies as a result of special conditions applying to the subsequent deliveries in question.
- d. The fact that the company initiates the investigation of a complaint or initiates negotiations on the presentation of the complaint does not prevent the company from maintaining that the complaint has been presented too late, or from maintaining that the liability of the company is limited, unless the company has made an offer of compensation without stating that the offer has been made without prejudice for a subsequent judicial settlement.

## 3. Company Liability

- a. In cases where complaints are justified, the company is entitled at its own expense to seek to have defects or deficiencies remedied. Should the company not wish to do so, or should such a remedy not be possible, then the company is only to be liable for the customer's expenses for the goods that have been delivered, but not for any loss in profits or any demands originating from third parties.

## 4. Other Regulations

- a. Technical information or any other information originating from the company etc. may not be used in marketing or in any other way in relations with third parties without the approval of the company, and any such approval is never in any case to incur liability for the company.
- b. Should our terms of payment not be adhered to, then interest is calculated at the rate of 2% per month commenced calculated from the date payment was due.
- c. Seconds will be invoiced with 25% discount.

## 5. Venue and Legal Basis

The venue is SØ- & Handelsretten (the Maritime and Commercial Court) in Copenhagen. Matters of law involving the company and the customer are in all cases to be settled according to Danish Law.
